Greetings, Shadows! We are excited to announce the promotion of Agent CT-66-6666 AKA "Seven" AKA Shadow 7 to **Section Leader**. As most of you know, Seven has been mission leader on multiple operations. He has been an invaluable asset to Shadow Sinfonia over the past several months.

While it might be medically accurate to say that they made millions just like Seven, I think we all know the true story is: he's one of a kind.

As demands for our services increase, we are expanding our reach. Seven is in charge of our newly appointed section: **Shadow Sinfonia Septet of Subtle Solutions (S5).**

The YT-1300 light freighter, *Minuet*, is being assigned to this section. S4 will also provide support to S5 when practical. However, the new S5 section will often need to operate independently.

Please join me in congratulating Section Leader Seven on his well-deserved promotion. And more importantly: be prepared to sign up for S5 missions.

S4 extends its congratulations to Shadow 7 on his optimal promotion to Section Leader.   I immediately approved the Conductor's decision during our brief holo-conference. However, S4 will be hard-pressed to fill Shadow 7's vital role on future missions. It is my hope that Section Leader Seven will still be available for S4 ops when he is not busy overseeing S5. I have no doubt that Seven will continue to be highly productive in either role.

Wow, Arlen really needs to change his password again. This is Van-Chavez on this part right here, in case you didn't figure that out already. Please don't crash the Minuet *or get her impounded. If you take good care of her, the Conductor may send you a* _real_ *ship one day. Still, I have a soft spot for that piece of poodoo YT-1300...so don't let no saber swingers scratch it up too bad, OK?*
